Dear Mr. Andres Plant Manager

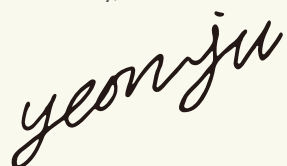

I am writing this letter to express my interest in the UX UI designer position opening as advertised on LinkedIn. I am a student at Fanshawe College, expected to graduate in May of 2022, and did post-graduation in visual communication design program from Korea. I was previously working for a design agency company in Korea for over two years.

I undertook various graphic designing activities working with many teams. I have worked on several big projects and developed successful outcomes for the company's clients. During the time, It helped me not only to be familiar with popular graphic Adobe design tools but also to adjust to working in a fast-paced and fast-changing environment. Later, while studying interactive media design, I designed the website using Adobe xd, and I was able to understand css, html, js and some framework languages. And this experience can facilitate communication between developers and designers. During the time, I found that forming a good teamwork contributes not only to my own development but also to goals pursued by everyone.

My time studying abroad in Canada allowed me to learn about various cultures and different work systems from Korea and broaden my views.

Thank you for your time and consideration, I would love to further discuss my application and the position with you in greater detail. Please feel welcome to contact me by email to arrange an interview. I look forward to hearing from you.

Sincerely,

Yeonju Kim
